

Alejandro Relling

1) Experticia

a) Títulos

Denominación de la carrera: Medicina veterinaria

Institución otorgante del título: UNLP

Fecha ingreso: 1994 Fecha egreso: 1998

Denominación de la carrera: Masters in Animal Sciences

Institución otorgante del título: The Ohio State University

Fecha ingreso: 2003 Fecha egreso: 2006

Denominación de la carrera: PhD

Institución otorgante del título: The Ohio State University

Fecha ingreso: 2006 Fecha egreso: 2009

b) Cargo en el IGEVET

Investigador Correspondiente

Fecha Inicio: Julio 2021.

c) Línea de trabajo

Nutrición y metabolismo en rumiantes

2) Cargo/s Docente/s.

2021-Presente Associate Professor, Department of Animal Sciences, The Ohio State University

3) Cargo en Gestión

Director Asistente del Doctorado interdepartamental de Nutrición de The Ohio State Univiversity

3) Trabajos Publicados aclarar si es con referato: se deberá especificar el número total y detallar últimos cinco años: Autor/es, año de publicación. Título, revista, volumen, páginas, doi si lo tuviera.

Total: 70

1. Rosa-Velazquez, M., J. M. Pinos-Rodriguez, A. J. Parker, and A. E. Relling. 2022. Maternal supply of a source of omega-3 fatty acids and methionine during late gestation on the offspring's growth, metabolism, carcass characteristic, and liver's mRNA expression in sheep. *J. Anim. Sci.* doi:10.1093/jas/skac032
2. Pittaluga, A. M., C. Chris, and A. E. Relling. 2021. Effect of protein source and nonroughage NDF content in finishing diets of feedlot cattle fed free-choice hay on growth performance and carcass characteristics. *Translational Animal Science.* txab224 doi: 10.1093/tas/txab224
3. Nickles, K. R., A. E. Relling, and A. J. Parker. 2021. Intranasal oxytocin treatment on the day of weaning does not decrease walking behavior or improve plasma metabolites in beef calves placed on pasture. *Translational Animal Science.* txab191. Doi: 10.1093/tas/txab191
4. Pittaluga, A. M.; T. L. Felix, L. E. Moraes, and A. E. Relling. 2021. Effects of increasing levels of soybean hulls in finishing diets of feedlot cattle fed free-choice hay on performance, roughage intake, and carcass characteristics. *Applied Animal Science.* 37:525-532. doi: 10.15232/aas.2021-02173

The Effects of Supplementing Increasing Doses of EPA and DHA Fatty Acids to Ewes in Late Gestation on Ewe Performance and Milk Production and Offspring Performance and Plasma Metabolites. Annual Meeting, Midwest section of ASAS. doi: 10.1093/jas/sky073.478. Peer Reviewed
32. Carranza Martin A. C., D. N. Coleman, L. Garcia, C. C. Furnus, and A. E. Relling. 2018. Effect of different fatty acid profile on the maternal and finishing diet on performance and carcass characteristics in lambs. Annual Meeting, Midwest section of ASAS. doi: 10.1093/jas/sky073.458. Peer Reviewed
33. Coleman, D. N., A. C. Carranza Martin, and A. E. Relling. 2018. Effect of different fatty acid profiles in the maternal and finishing diet on subcutaneous adipose tissue fatty acid profile and gene expression. Annual Meeting, Midwest section of ASAS. doi: 10.1093/jas/sky073.457. Peer Reviewed
34. Coleman, D. N., A. C. Carranza Martin, and A. E. Relling. 2018. Effect of different fatty acid profiles in the maternal and finishing diet on liver fatty acid profile and gene expression. Annual Meeting, Midwest section of ASAS. doi: 10.1093/jas/sky073.456. Peer Reviewed

cinco años: Autor/es, año de publicación. Título, páginas, editorial, país, ISBN y doi si lo tuviera.

6) Proyectos en los que participa: número de proyectos en los que ha participado. Se deberá detallar en los que se encuentran en vigencia: título, código y organismo que otorgó el financiamiento, indicando su rol y la programación del mismo.

1. An innovative approach to improve nitrogen utilization in ruminants (USDA/NIFA AFRI \$468,923) 2020-2023.
2. Effect of native rumen microbes supplementation on growth, feed efficiency, and methane emission in feedlot cattle (Ascus Bioscience AWD-109727 \$98,271) 2020- 2021.
3. Understanding the biology of fetal programming and subsequent offspring growth (OARDC Seeds program \$37,551). 2020- 2021.
4. Effect of lipid supplementation during gestation to improve offspring growth on pasture systems (Ohio sheep and wool Program. \$5,642.72). 2019- 2020.
5. Effect of supplementation with a mineral vitamin mixed on growth and metabolic profile of weaned calves" (Biogenesis Bago. \$22,391.2). 2019- 2020.
6. Effect of Tracesure sheep and lamb and Copasure 4g on plasma concentration of Co, I, Se and Cu in sheep (Animax Ltd. \$10,733.75). 2018.
7. Effect DHA and EPA on early gestation and its impact in performance and metabolic profile on the offspring lambs (Virtus Nutrition, LLC. \$25,133). 2018
8. Effect of mineral and vitamin with antioxidant capacity in breeding cows (Biogenesis Bago. \$7,851). 2017-2019.
9. Effect of Prebiotics on Health Performance of Newborn Calves (Ohio Dairy Research Found. \$ 4,000). 2017
10. Association between metabolic parameter and reproduction in lactating dairy cows. (Ohio Dairy Research Found. \$3,550). 2016
11. The effect of Virginiamycin in combination with Monensin upon the productive response of Holstein cows (Phybro Animal Health, Arg. \$67,404). 2013
12. Improvement on animal performance thru nutrition and health management on Argentinean Feed lots (IPCVA, Arg. \$68,701). 2012.
13. Endocrine regulation of lipids mobilization in sheep (PIP CONICET Amount: Arg. \$36,000). 2011-2013
14. Metabolism of fatty acids on beef cattle, and its effect of fetal development (PICT. CONICET Amount: Arg. \$200,000). 2011-2013.
